CS3243 Introduction to Artificial Intelligence

Assignment Submission Guidelines

Important Instructions

- Weekly assignments comprise of selected questions from the corresponding weekly tutorial, starting from Tutorial 1.

- Refer to each tutorial worksheet for its respective assignment deadline.

- Assignments are to be done and submitted individually.

- Your submitted solution **should only consist of the solution to the specified assignment question**. It **should not include the question** (apart from any question numbering). It must also not include solutions to other questions. **Failure to comply with this instruction may result in your submission not being graded.**

File Naming Convention

Your assignment submission should consist of either ONE (1) Microsoft Word `.docx` file or ONE (1) PDF `.pdf` file (if you prefer to use LaTeX).

Please use the following naming convention:
`TutX_StudentNumber.docx` or `TutX_StudentNumber.pdf`

(e.g. `Tut1_A0123456G.docx`)

where

- `X` is the tutorial document number.

- `StudentNumber` is your student number beginning with `A`.

File Formatting

Clearly state the following details at the top of the document in your submission.

- Tut`X` Assignment, where `X` is the tutorial document number.

- Student number, name, and tutorial **group** number (T01, T02, T03, T04, T05, etc.)

Submission

To submit your assignment, navigate to:
`LumiNUS > CS3243 > Files > Assignment Submissions`

Your submission should be made within the folder corresponding to your tutorial group. Do not submit multiple files.

Late submissions are strictly disallowed. Refer to the specific tutorial worksheet for the associated assignment submission deadline.

Grading and Feedback

Graded assignments may be reviewed on LumiNUS by simply accessing your submitted file.

The assignment questions, together with the other tutorial questions, will be discussed during tutorial sessions.

If you have any further questions, do approach your tutor.
